2 Syntax in Menu Name & Menu URL

MENU NAME

- **#category=id_category**

With this syntax, we can get the category name

Example: #category=3

The screenshot illustrates the process of generating a menu item name using a category ID. At the top, a table lists categories, with the first row showing ID '3' for 'Women'. A red box labeled 'id_category' highlights this ID. Below, a configuration form for '#CATEGORY=3' shows the 'Name' field set to '#category=3', which is labeled 'syntax'. The 'URL' field is also '#category=3'. The 'Displayed' toggle is set to 'YES'. At the bottom, a navigation bar shows the result: 'WOMEN' (highlighted with a red box and labeled 'result'), 'SHOP', 'BRANDS', and 'FEATURES' (with a 'PRO' badge).

- **#page=id_page**

With this syntax, we can get the CMS page name

Example: #page=4
