

Z.ONE • SUPPERMARKET STORE - INSTALLATION

- From PrestaShop Addons DOWLOADS page, you will need to download the **ZOne • Supermarket** Theme package to your computer.

» PrestaShop Site

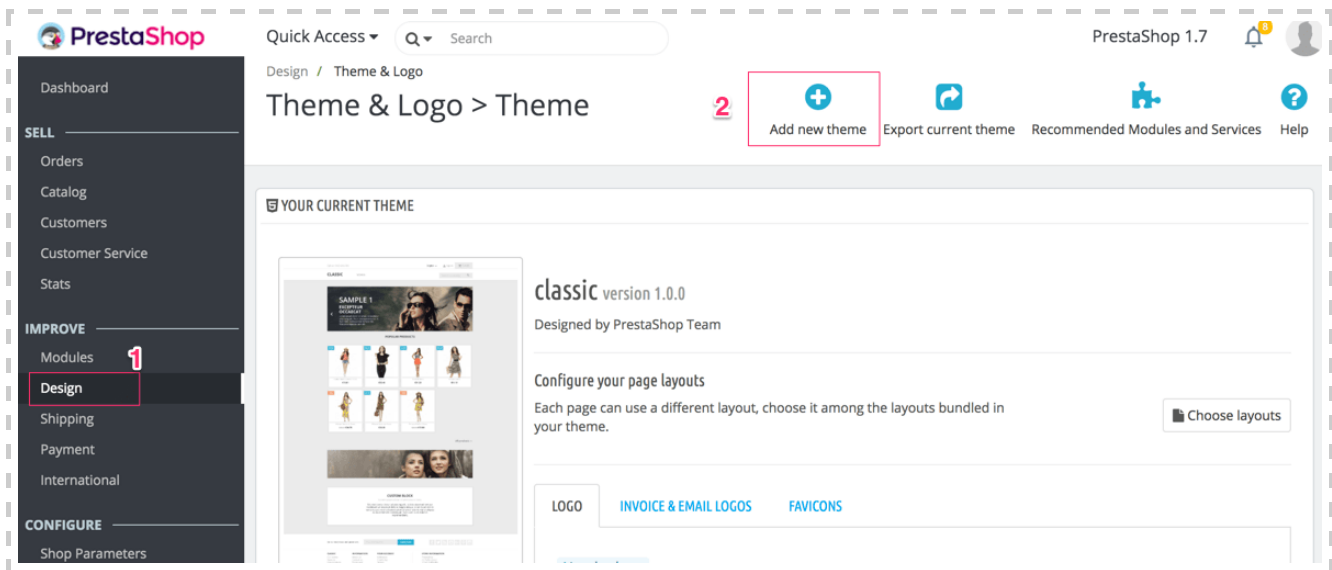

You need to have a PrestaShop site.

You can download the source code of PrestaShop (version 1.7.1.x) (<https://www.prestashop.com/download>) and install it on your site.

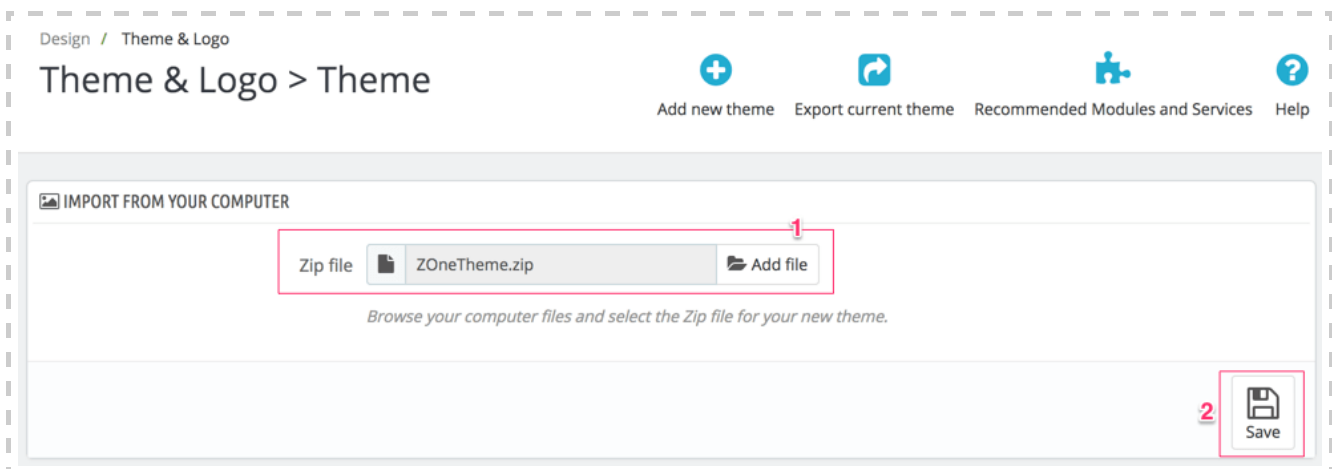

Log in to your PrestaShop back office.

» Add and Active ZOne Theme

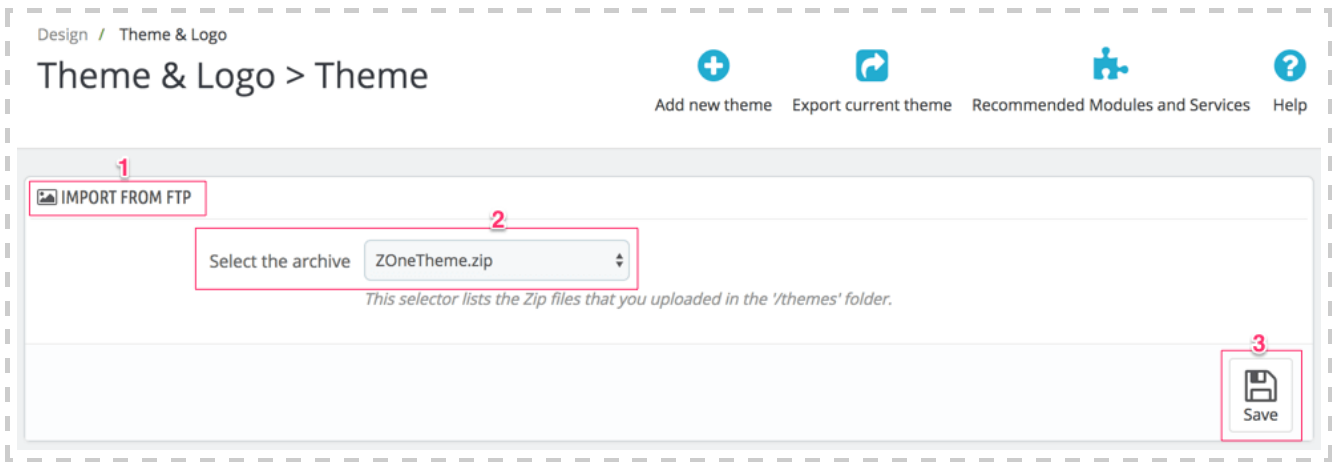

- Go to the **Theme** page (Design → Theme & Logo)
- Click on the **Add new theme** button at the top right corner.

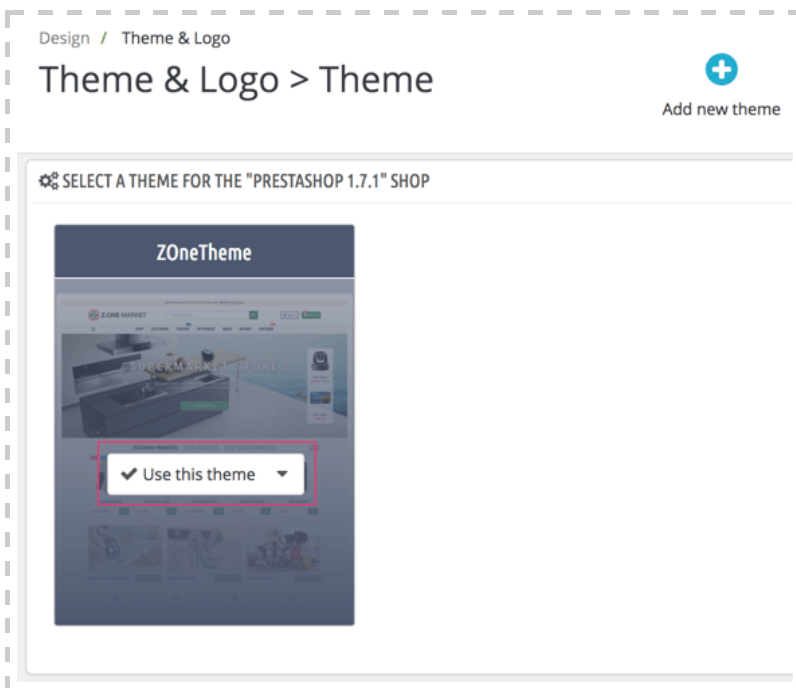

- From the **Import Theme** page, click the **Add file** button in the **IMPORT FROM YOUR COMPUTER** section.
This allows you to select the file **ZOneTheme.zip** from your local computer.

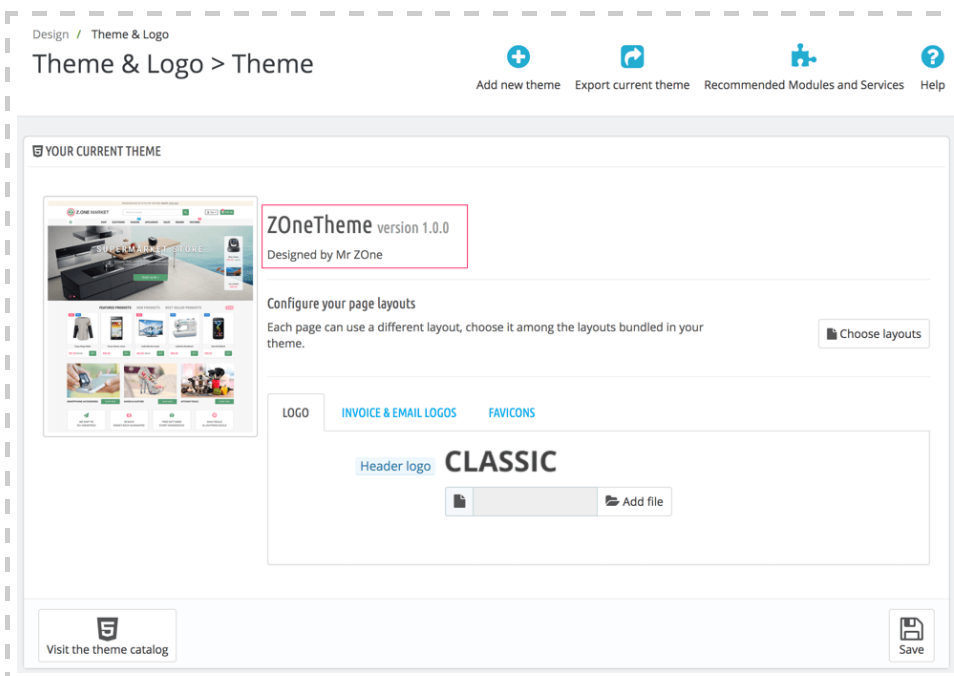

- Click on the **Save** button.
- If you can not add theme from your local computer, try to **IMPORT FROM FTP**

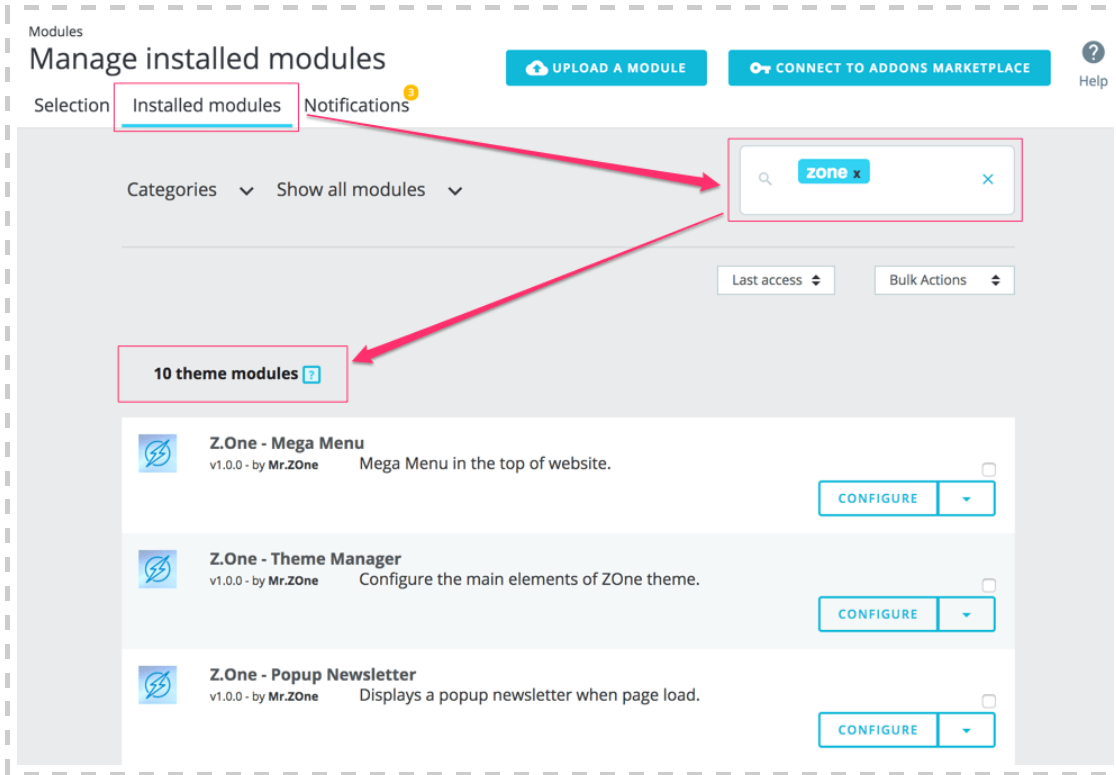

- After your theme has been installed you will be taken back to the main **Theme** screen.
You will see the **ZOneTheme** listed in the **SELECT A THEME FOR THE "PRESTASHOP 1.7" SHOP** section.
- Click on the **Use This Theme** button.

- You will see the **ZOneTheme** in the **YOUR CURRENT THEME** section.

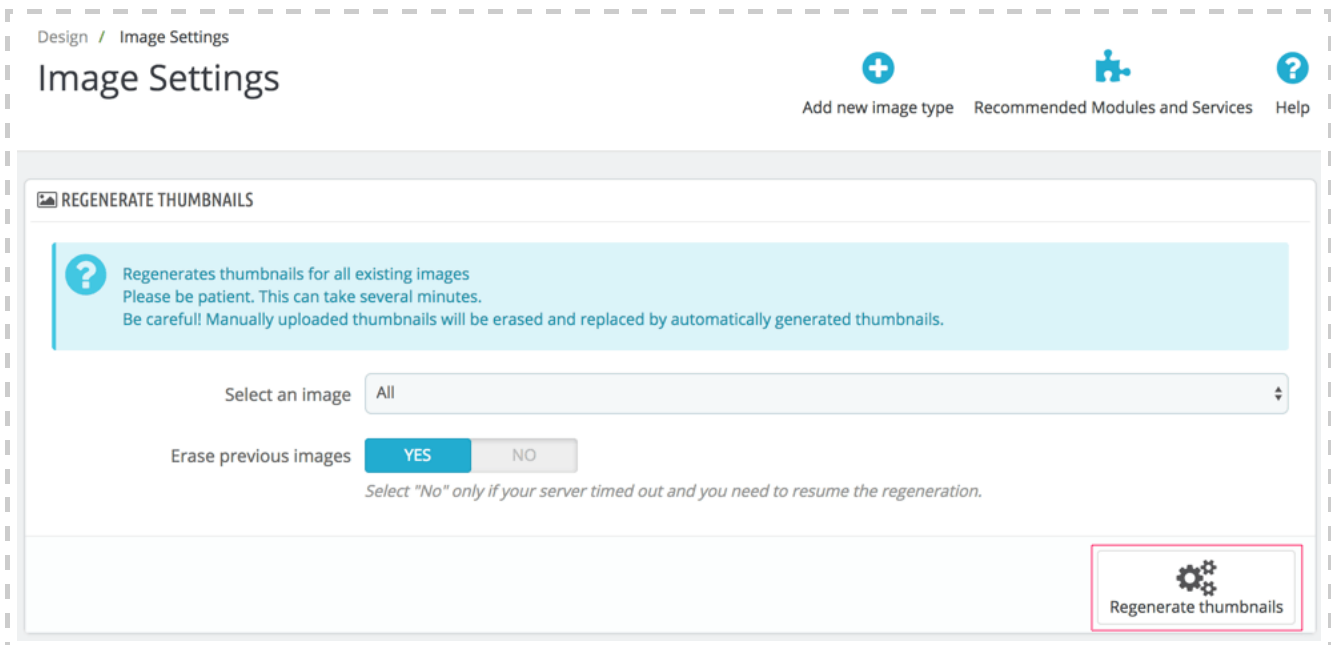

- And there are 10 **Z.One** modules is installed in the **Modules** page (Modules → Modules & Services → Installed modules)

» Regenerate thumbnails

- Go to the **Image Settings** page (Design → Image Settings)
- In the **REGENERATE THUMBNAILS** section, click on the **Regenerate thumbnails** button

- Wait until you see the success message

» Import ZOne Module Settings

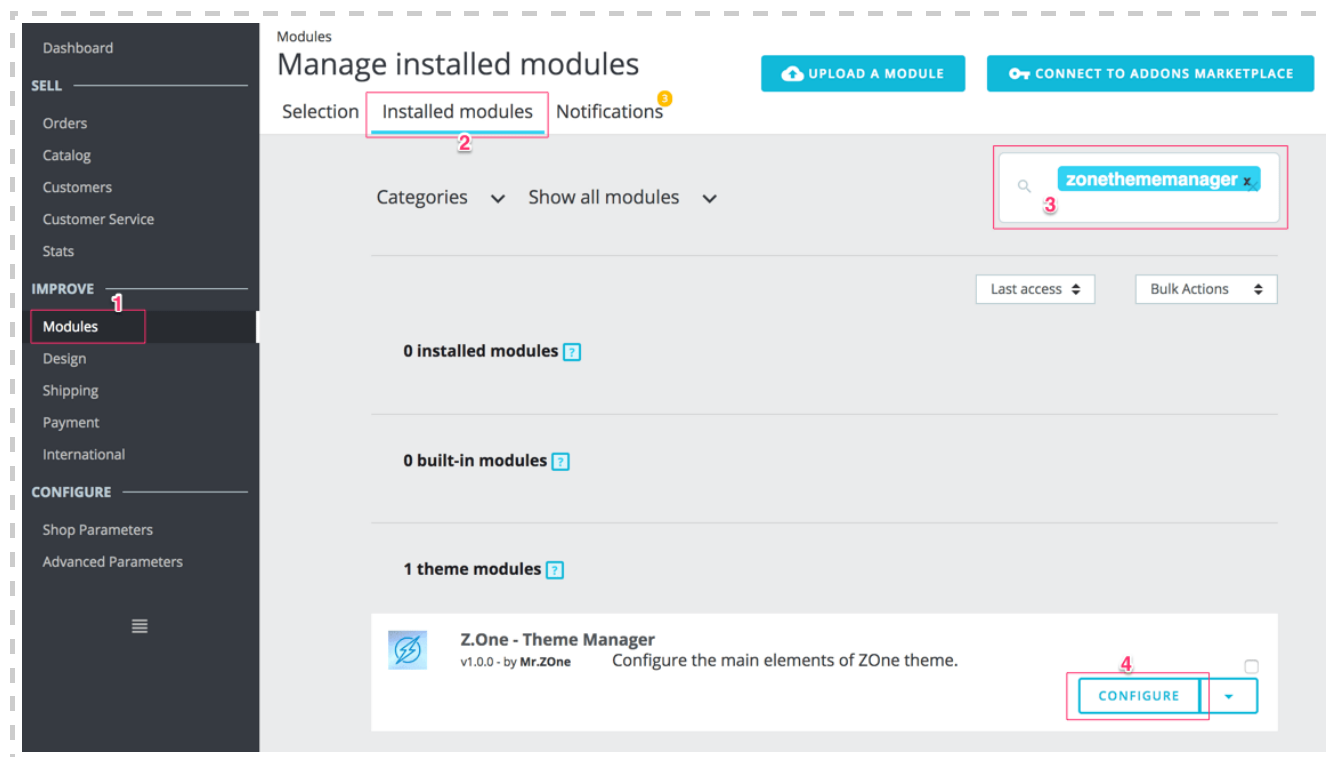

At this point the new theme should be showing up in your store.

This theme works on the **ZOne modules** and other default modules of PresraShop.

We have exported the database of the **ZOne Modules** settings on the demo site.
You can import it into your site by using the **ZOne - Theme Manager** module.

- Go to the **Manage installed modules** page (Modules → Modules & Services → Installed modules)

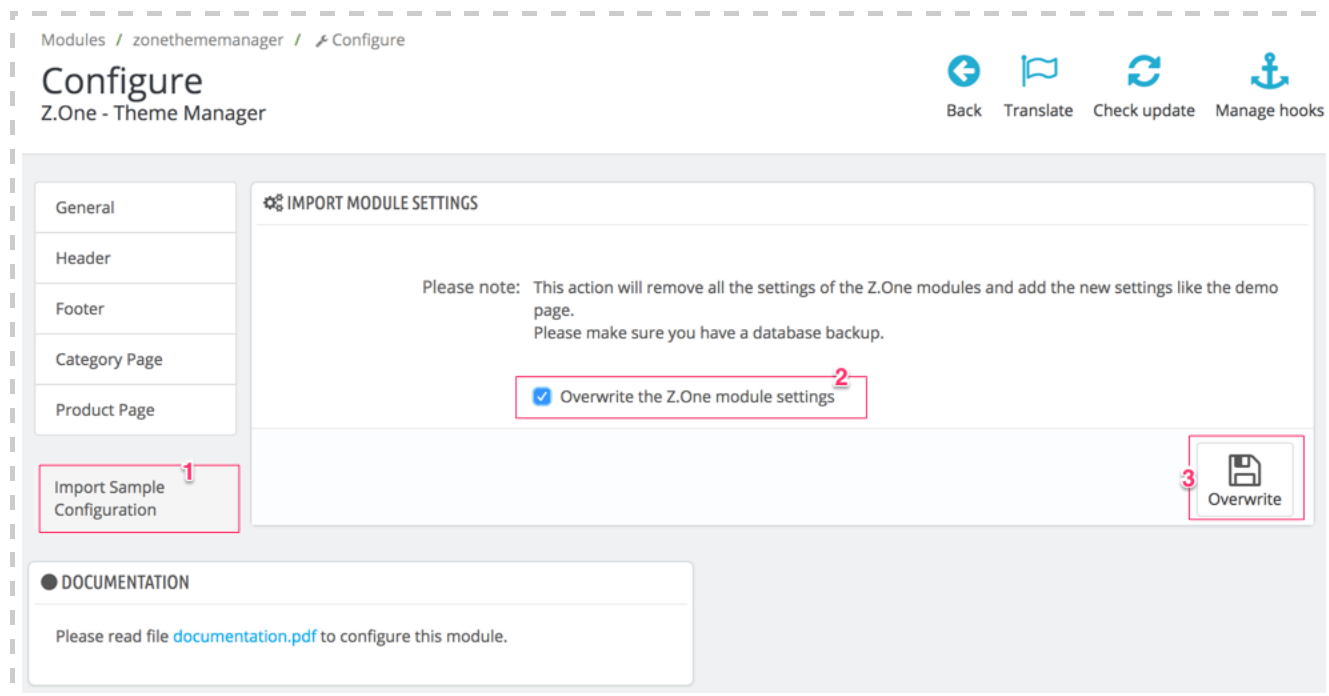

Find the **zonethememanager** module (Z.One - Theme Manager), click on **CONFIGURE** button

- On the **Configure Z.One - Theme Manager** page, choose the **Import Sample Configuration** tab

Check on **Overwrite the Z.One module settings** option

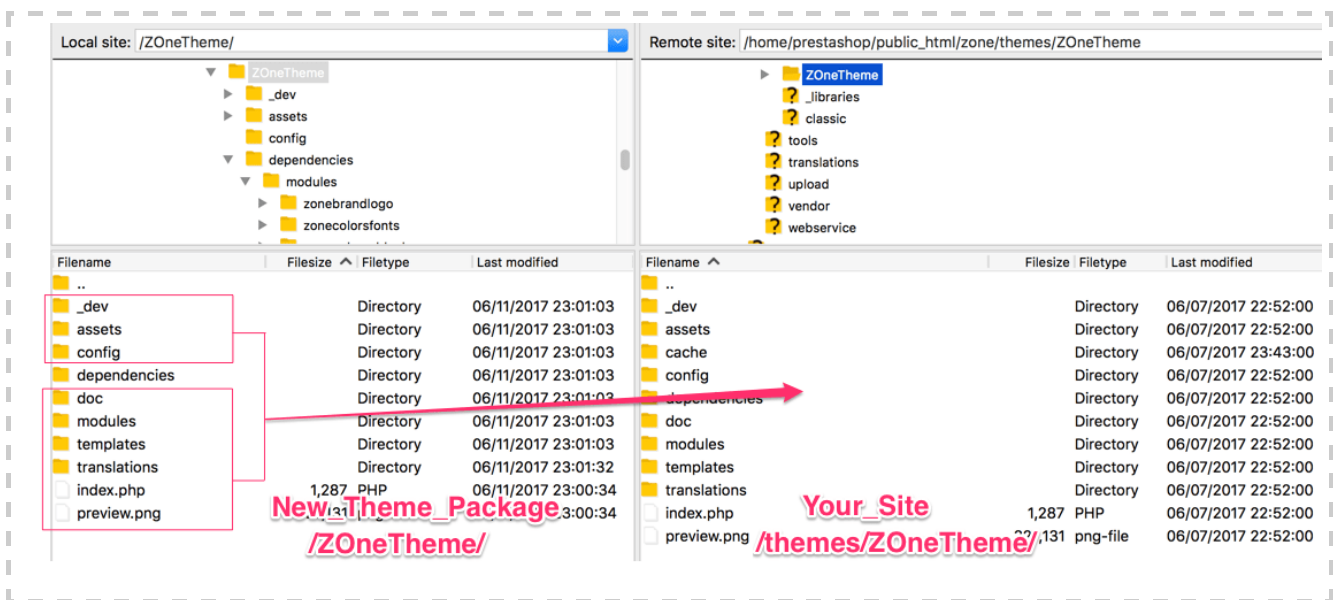

Then click on **Overwrite** button

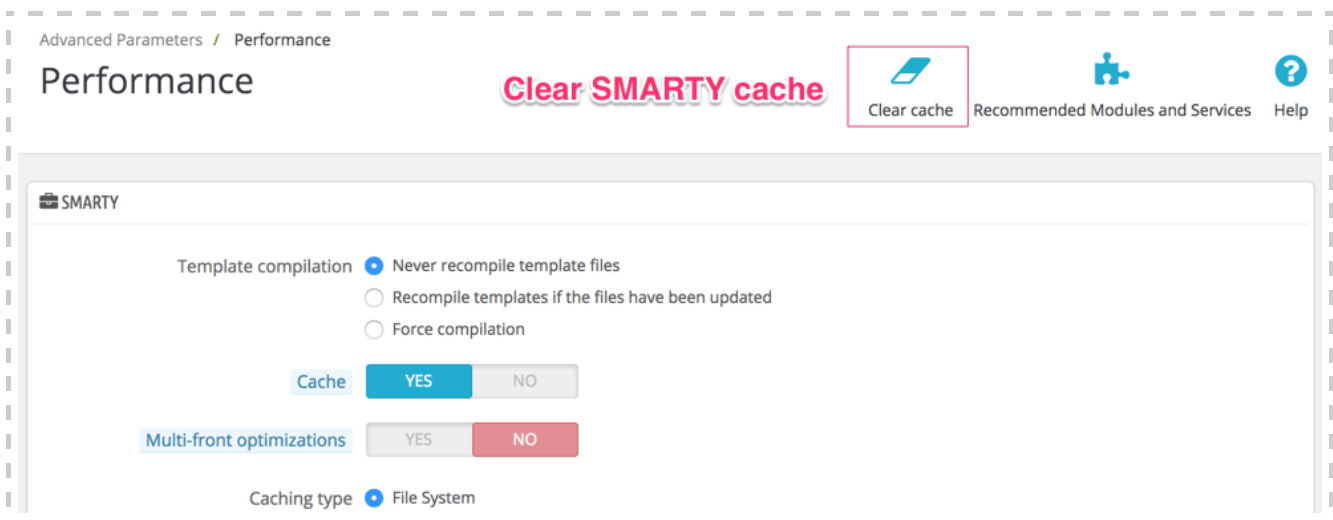

- After importing, you have to clear the Smarty cache of your site

Go to the **Performance** page (Advanced Parameters → Performance)

Click on **Clear cache** button.

- 3 Clear the smarty cache in the backoffice, **Performance** page

- 4 Preview at the front-end

» Module List
